

HOW TO KEEP COSTS LOW

during your basement remodeling project?

1

OPT FOR A PREFABRICATED EGRESS WINDOW AND WELL

By choosing prefabricated windows and wells, you can save \$2,000 per egress window.

CHECK THE EXTERIOR WALLS BEFORE FINISHING

Inspecting for moisture at the final stage can save you money and time in the long run

2

3

USE LESS STUDS WHERE POSSIBLE

You can reduce the number of studs from the non load-bearing walls.

USE DROP CEILINGS

Keeping the plumbing and electrical system above the drop ceiling makes it easy for you to reach them anytime you need to.

4

5

INSTALL VINYL TILE

Luxury vinyl tile is a more affordable option in the case of moisture problems.

ADD A BATHROOM NEAR THE PLUMBING

Building bathroom close to existing plumbing saves time and money.
